PROFESSIONAL SUMMARY

Full-stack software developer and recent SAIT graduate who ships and runs real products: a production childcare management SaaS on Next.js, Supabase and Stripe, and Pulse, an AI-coached food and training app in beta on Google Play. I work in TypeScript, React, React Native, Node.js, Python and SQL, led a team delivering an Azure microservices platform, and design AI features that still work when the model does not. Three years in client-facing marketing operations taught me to turn business needs into working systems.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML, CSS
Frameworks: React, Next.js, React Native, Expo, Node.js, Express, Vite, Tailwind CSS
Data & Services: PostgreSQL, Supabase (auth, row level security, storage), Azure SQL, Azure Blob Storage, Firebase, Stripe, Resend
Cloud & Tools: Microsoft Azure (Container Apps), Vercel, EAS Build, Git, GitHub, CI/CD, Jira, Vitest, Supertest, Playwright
AI: LLM features with human approval and safe fallbacks, prompt design; GitHub Copilot, Cursor, Claude, ChatGPT

PROFESSIONAL EXPERIENCE

Full Stack Developer & Project Manager | GBTAC, Calgary, AB 2026
Stack: TypeScript, React, Vite, Node.js, Express, Azure (SQL, Blob Storage, Container Apps), Vitest, Supertest, Playwright, CI/CD

- Led a 4-person Agile team delivering a public research platform, planning and tracking 150+ tasks across four sprints in Jira and owning the programming plan and testing strategy.
- Built both ends of a TypeScript microservices application (8 services plus an API gateway) on Microsoft Azure: a React and Vite front-end and Node.js and Express services backed by Azure SQL, Blob Storage and Container Apps.
- Led AI integration with a backend teammate, and built an ingestion pipeline that cleaned, normalized and loaded the Retrofit Canada dataset to power a choropleth map, EUI comparison charts and province-level analytics.
- Met sub-3-second load and sub-500ms filter targets, backed by Vitest, Supertest and Playwright tests and CI/CD.

Marketing Manager | Change Your Results Inc., Calgary, AB 2021 to 2024

- Architected marketing automation systems integrating CRM, email and scheduling tools, and built multi-channel lead intake funnels with conditional logic and automated routing.
- Rebuilt client onboarding workflows to shorten time-to-activation, working with senior leadership on growth targets.

PROJECTS

Childcare Management Platform | Production SaaS, solo build In production
Stack: Next.js, TypeScript, Node.js, Supabase (PostgreSQL, row level security), Stripe, Resend

- Designed, built and run a production childcare management platform with real users, owning schema design, REST APIs, UI, deployment and ongoing iteration from user feedback.
- Built tuition billing and invoicing on Stripe, real-time enrollment and revenue analytics, and automated email notifications through Resend.
- Security first: row level security policies that fully isolate each account's data, scrypt PIN hashing with constant-time checks, IP rate limiting, honeypot inputs, and short-lived signed URLs for private student documents.

Pulse | Google Play beta, iOS in TestFlight | pulse.rkmediacompany.com 2026
Stack: Expo, React Native, TypeScript, Expo Router, Supabase (Postgres, row level security), React Query, Vitest

- Built and shipped a food and training app with barcode food logging, personalized calorie, protein and training plans, and watch and scale sync through HealthKit and Health Connect.
- Added Coach, an AI assistant that reads the user's real logs and proposes plan changes that only apply after the user approves, offered through a C$9.99 a month Pulse Plus subscription.
- Designed the schema with row level security and database functions that rank group challenges without exposing anyone's raw logs, behind a unit-tested TypeScript plan engine and a swappable repository layer.

EDUCATION & DEVELOPMENT

Diploma in Software Development | SAIT, Calgary, AB May 2025 to August 2026
IBM Bob Developer Day, hands-on event on agentic AI coding tools | Calgary, AB July 2026
